DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a compound having an acid labile group attached to a polymer chain by an anhydride linkage, classified in class 528, subclass 270.
 - II. Claims 16-21, drawn to a compound having a dissolution inhibitor attached to a polymer chain by an anhydride linkage, classified in class 528, subclass 271.
 - III. Claims 22-26, drawn to a composition comprising a polymer having an acid labile group attached to a polymer chain by an anhydride linkage, classified in class 430, subclass 270.1.
 - IV. Claims 27-30, drawn to a method of using said composition, classified in class 430, subclass 322.
2. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I and II; II and III and II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a polymer having an acid labile group attached to a polymer chain by an anhydride linkage and a polymer having a dissolution inhibitor group attached to a polymer chain by an anhydride linkage.
 - b. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as procatalyst systems for drug delivery.

Art Unit: 1752

- c. Inventions I and IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful in procatalyst systems for drug delivery and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- d. Inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process of using that product such as etching the exposed composition to form a semiconductor or exposing and developing to form an image.
3. Because these inventions are distinct for the reasons given above and the search required for each of the Groups are different, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1752

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
